OrthoWorx
The Indiana Life Sciences Collaboration Conference Series, coordinated by the IU Kelley School of Business’ Center for the Business of Life Sciences, provides a forum for various players in healthcare and life sciences to strategically consider key business issues. Executives, scientists, medical practitioners, researchers, policymakers and academics drawn from a wide range of backgrounds all contribute to the discussion. Conferences are organized for attendees to increase their knowledge AND have the opportunity to make new connections across the life sciences spectrum.

**Conference 1**

**Healthcare Reform: The Road Ahead**

September 17, 2010

Location: Fairbanks Hall, I.U. Clarian Education and Resource Center
340 West 10th Street, Indianapolis, IN

Primary Sponsors: Baker & Daniels LLP
EI Lilly and Company
Clarian Health

Supporting Sponsors:
Mayer Naeem Corporation
BIA LifeStructures
Atdelo Consulting, Inc.

This ground-breaking and sweeping piece of legislation seems to be on everyone’s mind. As we begin to receive guidance from Federal agencies and the White House on many of the issues and opportunities created by the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act, more and more questions arise. What will it really mean for us as an agent, employee and employer? What will it mean for Indiana’s healthcare and life sciences businesses, and business in general? How do we get here and what does the future hold?

This conference on the past, present and future of health care reform will review the balancing of interests it took to pass this monumental legislation, provide an update on the rules and regulations being written to implement the bill, and the latest thinking on the costs and implications of the bill. Participants will leave with a better idea of the impact this piece of legislation will have on their lives and their business—today and tomorrow.

**Conference 2**

**Life Sciences Human Capital**

November 19, 2010

Location: Cook Medical World Headquarters
750 Daniels Way, Bloomington, IN

Primary Sponsors: AIT Laboratories
Cook Medical
Purdue University
Taft Stettinus & Hollister LLP

Supporting Sponsors: Commissioning Agents, Inc.

According to the new Battelle/BIO Report “State Bioscience Initiatives 2010,” Indiana is one of only five states with specialized bioscience employment in three of the four subsectors – Agricultural Feedstock & Chemicals, Drugs & Pharmaceuticals, Medical Devices & Equipment, and Research, Testing & Medical Laboratories. This conference will explore how Indiana can continue to respond and adapt to the growing and changing human capital needs of the life sciences industry. Industry representatives will discuss the types of employees they currently seek and expect to be seeking in the future. Educators and representatives from state government will then discuss how their institutions intend to help meet those needs. Participants will leave with a better understanding of the importance of human capital to the growth of the industry in Indiana and with concrete ideas for strengthening the state’s life sciences human capital base.

**Conference 3**

**An Update on Regulatory Compliance**

February 25, 2011

Location: Barnes & Thornburg LLP
11 South Meridian Street, Indianapolis, IN

Primary Sponsors: Aronson Group
Barnes & Thornburg LLP

Supporting Sponsors: Biokelman Coulter, Inc.

The new administration, leadership and legislation are all contributing to changes in how the FDA performs its role. At the same time manufacturers of pharmaceutical products, nutritional, medical devices, diagnostic equipment as well as other medical technologies are increasingly looking for new ways to distribute, market and sell their products. Many would say that the effects of this combination are putting businesses under more rigorous regulatory scrutiny, subjecting companies to more liability and delaying the availability of new products and therapies to healthcare providers and, ultimately, the public. This program will bring experts from industry and the regulatory environment together to discuss whether this is indeed the case and review strategies for the way ahead.

---

**Conference 4**

**Health Information Technology: Indiana’s Role in the Development of a National Model**

May 13, 2011

Location: IU School of Medicine - Walther Hall (Research Building III) Auditorium
980 W. Walnut Street, Indianapolis, IN

Primary Sponsors: Ice Miller LLP
Indiana Clinical and Translational Sciences Institute
IU School of Medicine
Zimmer

Supporting Sponsors: Indiana Health Information Exchange
NoMoreClipboard.com
Symmetry Medical, Inc.

Proponents have argued that the full utilization of electronic health records will serve to improve patient care, increase patient safety, promote translational sciences, simplify compliance and regulation of the US healthcare system and save money. All this may occur if the roadblocks to success are identified and appropriately handled. Does the science back this out? The federal government is injecting billions of dollars into this experiment with the passage of the American Recovery and Reinvestment Act (ARRA) and the Health Information Technology for Economic and Clinical Health Act (HITECH Act). This conference will focus the national spotlight on Indiana and explore the legislation and the standards for meaningful use of health information by engaging Indiana stakeholders in a discussion of Indiana’s role in the national dialogue surrounding the generation and effective use of health information. The conference will examine the current status in Indiana, opportunities for advancement and the impact of meaningful use upon patients, providers, taxpayers, researchers, insurers, regulators and other stakeholders.
